# ABOUT US

Connecting Global Pharma Supply Chains with Reliability & Precision

Belmonte Global is an international sourcing and supply partner dedicated to raw materials for the pharmaceutical, nutraceutical, and healthcare industries.

## OUR MISSION

To empower pharmaceutical and nutraceutical manufacturers worldwide by delivering seamless, transparent, and fully compliant raw material sourcing solutions. We bridge the gap between audited global manufacturers and formulation leaders through rigorous quality assurance and supply chain continuity.

## OUR STRATEGIC SOURCING APPROACH

We identify, evaluate, and secure high-purity APIs, intermediates, functional excipients, and specialty ingredients. Our approach emphasizes risk mitigation, regulatory alignment (cGMP, FDA, EMA), and logistics oversight to support production continuity.

**GLOBAL REACH**  
International supply networks and regional expertise serving pharmaceutical leaders across global markets, including CIS and GCC.

**REGULATORY RIGOR**  
Technical dossiers, CoA verification, and cGMP compliance checks, as applicable to each material and supply route.

**SUPPLY CHAIN RESILIENCE**  
Proactive inventory planning and logistics management designed to reduce delays and support batch availability.

## PARTNER WITH BELMONTE GLOBAL

Discuss your sourcing needs, specifications, grades, volumes and documentation requirements.

# PRODUCT CATEGORIES

Explore our comprehensive portfolio. Each category is detailed in the following pages. Full technical specifications, grades (Pharma / Food / Cosmetic / Feed) and regulatory documentation are available upon inquiry.

|    |                                                                                                                                                          |

# 01 • ACTIVE PHARMACEUTICAL INGREDIENTS & INTERMEDIATES

Comprehensive commercial sourcing catalogue covering major therapeutic classes. CAS, ATC codes, pharmacopoeial grades, country of origin, manufacturer dossiers and MOQ available on request. Some APIs appear in more than one category where clinically relevant.

| Therapeutic Category           | Entries | Key Sub-classes / Highlights                                                                                    |
|--------------------------------|---------|-----------------------------------------------------------------------------------------------------------------|
| Antibiotics                    | 81      | Penicillins, Cephalosporins, Macrolides, Fluoroquinolones, Tetracyclines, Aminoglycosides, Carbapenems & others |
| Cardiovascular APIs            | 54      | ACE Inhibitors, ARBs, Beta Blockers, Calcium Channel Blockers, Diuretics, Antiarrhythmics                       |
| Oncology APIs                  | 47      | TKIs, Cytotoxics, Hormonal agents, PARP inhibitors, BTK inhibitors & more                                       |
| Antiviral APIs                 | 40      | Herpes, Influenza, HIV, Hepatitis & broad-spectrum antivirals                                                   |
| Psychiatric APIs               | 37      | SSRIs, SNRIs, Atypical antipsychotics, Benzodiazepines, Mood stabilisers                                        |
| CNS / Neurology                | 36      | Antiepileptics, Parkinson's, Alzheimer's, Migraine (triptans & gepants)                                         |
| Gastrointestinal               | 33      | PPIs, H2 blockers, Antiemetics, Antispasmodics                                                                  |
| Antidiabetic APIs              | 30      | Biguanides, Sulfonylureas, DPP-4, SGLT2, GLP-1 RAs, Dual incretin                                               |
| Analgesics & NSAIDs            | 28      | NSAIDs, COX-2, Non-opioid & Opioid analgesics                                                                   |
| Respiratory APIs               | 28      | Beta-agonists, Anticholinergics, Corticosteroids, Leukotriene modifiers                                         |
| Antifungal APIs                | 23      | Azoles, Echinocandins, Allylamines & polyenes                                                                   |
| Ophthalmic APIs                | 23      | Prostaglandin analogues, Beta-blockers, Carbonic anhydrase inhibitors, Antibiotics                              |
| Antiparasitic                  | 22      | Anthelmintics, Antimalarials, Antiprotozoals                                                                    |
| Dermatology APIs               | 21      | Acne treatments, Topical corticosteroids, Calcineurin inhibitors                                                |
| Urology APIs                   | 20      | Alpha-blockers, 5-ARIs, PDE5 inhibitors, Antimuscarinics                                                        |
| Anesthetics & Emergency        | 20      | Local & general anesthetics, Vasopressors, Reversal agents                                                      |
| Anticoagulants & Antiplatelets | 19      | DOACs, Heparins, Antiplatelets, Thrombolytics                                                                   |
| Antihistamines & Allergy       | 19      | 1st & 2nd generation, Nasal & ocular agents                                                                     |
| Lipid-Lowering                 | 18      | Statins, Fibrates, PCSK9, Bempedoic acid, Bile acid sequestrants                                                |
| Immunosuppressants             | 18      | Calcineurin inhibitors, mTOR, JAK inhibitors, Conventional DMARDs                                               |
| Specialty APIs                 | 22      | PAH agents, Rare disease, Chelating agents, Other specialty                                                     |
| Hormonal & Steroid             | 30      | Corticosteroids, Sex hormones, Thyroid, other endocrinology                                                     |
| Hematology APIs                | 14      | Erythropoiesis, Anticoagulant adjuncts, Iron agents                                                             |
| Musculoskeletal & Rheumatology | 20      | Muscle relaxants, Bisphosphonates, Gout agents, DMARDs                                                          |
| Vitamins & Nutrients (Pharma)  | 21      | Water- & fat-soluble vitamins, CoQ10, Carnitine, ALA                                                            |

*Note: Intermediates for major synthesis routes (e.g. beta-lactam, statin, antiviral scaffolds) are available through our qualified manufacturer network. Full list and regulatory status on inquiry.*

## 02 • SUPPLEMENTS & NUTRACEUTICALS

Complete portfolio covering vitamins, amino acids, proteins, creatine, joint-care, omega oils, probiotics, botanicals and functional ingredients. Available in Pharma, Food and selected Animal/Feed grades. Premixes and custom blends offered.

| Group                         | Key Ingredients & Forms                                                                                                                                                      |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vitamins</b>               | Vitamin A, B-complex (incl. methylated forms), C (multiple salts & liposomal), D2/D3 (incl. vegan), E (tocopherols & tocotrienols), K1/K2 (MK-4, MK-7), Multivitamin systems |
| <b>Amino Acids</b>            | L-Arginine, L-Citrulline / Malate, L-Glutamine, BCAAs (2:1:1 / 4:1:1 / 8:1:1), EAAs, L-Carnitine forms, Acetyl-L-Carnitine, Taurine, NAC, Glutathione, Beta-Alanine, SAMe    |
| <b>Proteins</b>               | WPC80, WPI90, Hydrolyzed Whey, Native Whey, Clear Whey, Casein / Micellar Casein, Milk Protein, Collagen Protein, Pea / Rice / Soy / Hemp / Plant blends, RTD & bar bases    |
| <b>Creatine</b>               | Creatine Monohydrate, Micronized, Creapure®, Creatine HCl, Citrate, Malate, Magnesium Chelate, Buffered, Nitrate, Blends, Gummies                                            |
| <b>Minerals</b>               | Magnesium (Oxide, Citrate, Glycinate, Bisglycinate, L-Threonate, Taurate), Zinc (Picolinate, Bisglycinate), Iron Bisglycinate, Selenium, Chromium, Trace complexes           |
| <b>Joint / Collagen</b>       | Hydrolyzed Collagen Peptides (Bovine/Marine), UC-II, Glucosamine, Chondroitin, MSM, Hyaluronic Acid, Boswellia, Curcumin joint formulas                                      |
| <b>Omega &amp; Oils</b>       | Fish Oil (standard, High EPA/DHA, TG form), Krill, Cod Liver, Algal DHA/EPA, Flax, Evening Primrose, Borage, MCT, Omega 3-6-9                                                |
| <b>Probiotics &amp; Gut</b>   | Multi-strain, Lactobacillus & Bifidobacterium species, Saccharomyces boulardii, Bacillus coagulans, Synbiotics, Inulin, FOS, GOS, Psyllium, PHGG                             |
| <b>Botanicals (Strategic)</b> | Ashwagandha, Berberine, Curcumin 95% / enhanced, Milk Thistle, Ginseng, Green Tea/EGCG, Saw Palmetto, Rhodiola, Ginkgo, Elderberry, Echinacea                                |
| <b>Specialty / Functional</b> | CoQ10 / Ubiquinol, Alpha-Lipoic Acid, Astaxanthin, Lutein+Zeaxanthin, Myo-Inositol + D-Chiro, Phosphatidylserine, Alpha-GPC, Citicoline, Lactoferrin, Colostrum              |

**Strategic Priorities:** WPI90, WPC80, Creatine Monohydrate / Creapure®, Collagen Peptides, UC-II, Omega-3 concentrates, CoQ10, Vitamin D3 & K2 MK-7, Magnesium Bisglycinate, L-Citrulline, Beta-Alanine, NAC, Glutathione, Ashwagandha, Berberine, Curcumin, Multi-strain Probiotics, Electrolyte blends.

## 03 • COLLAGEN & GELATIN

Full range of collagen peptides, native collagens, specialty complexes and gelatin grades for pharmaceutical, nutraceutical, food, confectionery and cosmetic applications. Halal / Kosher certified options available.

### COLLAGEN PEPTIDES & NATIVE FORMS

| Product                                 | Source             | Form                    | Target                |
|-----------------------------------------|--------------------|-------------------------|-----------------------|
| Bovine Collagen Peptides (Type I & III) | Hide / bone        | Hydrolyzed powder       | Food / Nutra / Beauty |
| Marine Collagen Peptides (Type I)       | Fish skin / scales | Hydrolyzed / low-MW     | Beauty / Premium      |
| Porcine Collagen Peptides               | Porcine skin       | Hydrolyzed powder       | Food / Nutra          |
| Chicken Collagen Peptides               | Skin / cartilage   | Type I & II             | Joint / Skin          |
| Tripeptide Collagen (Bovine / Marine)   | Various            | Low-MW tripeptides      | Premium absorption    |
| Undenatured Type II Collagen (UC-II)    | Chicken sternum    | Native low-dose         | Joint health          |
| Eggshell Membrane Complex               | Eggshell membrane  | Types I, V, X + ECM     | Joint / Skin          |
| Collagen + HA / Vit C / Biotin Premixes | Bovine / Marine    | Ready blends            | Private label         |
| Instantized / Flavored Collagen Bases   | Bovine / Marine    | Agglomerated / flavored | Beverages / RTD       |

### GELATIN GRADES

| Product                              | Source                  | Form                   | Typical Use                               |
|--------------------------------------|-------------------------|------------------------|-------------------------------------------|
| Bovine Gelatin Type A / Type B       | Hide / bone             | Granules / powder      | Capsules, gummies, food                   |
| Porcine Gelatin Type A               | Skin                    | Granules / powder      | Gummies, marshmallow, capsules            |
| Fish Gelatin                         | Skin / scales           | Powder                 | Halal-friendly, lower bloom               |
| Halal / Kosher Bovine & Fish Gelatin | Certified sources       | Powder / granules      | Religious compliance markets              |
| Pharma Hard Capsule Grade            | Bovine / Porcine        | Capsule-grade          | Hard shell capsules                       |
| Pharma Softgel Grade                 | Bovine / Porcine / Fish | Softgel grade          | Soft gelatin capsules                     |
| Gummy Gelatin (150–250 Bloom)        | Bovine / Porcine        | Powder / granules      | Confectionery & nutraceutical gummies     |
| Hydrolyzed Gelatin / Specialty       | Various                 | Peptides / film grades | Protein fortification, microencapsulation |

## 04 • STRATEGIC OILS & EXTRACTS

High-demand carrier oils, specialty lipids, vitamin E forms and botanical extracts used across pharmaceutical, food, cosmetic and nutraceutical formulations. Multiple grades (Pharma / Food / Cosmetic) and certifications available.

| Oil / Lipid                                           | Primary Applications                                |
|-------------------------------------------------------|-----------------------------------------------------|
| Palm Kernel Oil                                       | Carrier / base oil, surfactants, cosmetics & pharma |
| Glycerin (Vegetable / Synthetic)                      | Humectant, solvent, sweetener, softgel plasticiser  |
| Coconut Oil / MCT Oil (C8, C8/C10)                    | Carrier, energy, keto, topical & oral               |
| Vitamin E (d-alpha, Mixed Tocopherols, Tocotrienols)  | Antioxidant, stabiliser, skin & heart positioning   |
| Fish Oil / Omega-3 (EPA/DHA concentrates)             | Softgels, liquids, functional foods                 |
| Algal DHA / EPA                                       | Vegan omega-3, prenatal, infant                     |
| Cod Liver Oil                                         | Classic A+D + omega positioning                     |
| Flaxseed / Evening Primrose / Borage / Black Seed Oil | Essential fatty acids, specialty softgels           |
| Sea Buckthorn / Pumpkin Seed / Wheat Germ Oil         | Cosmetic & nutraceutical specialty oils             |
| Essential Oils (Peppermint, Oregano, Rosemary etc.)   | Flavour, antimicrobial, topical & oral              |

### STRATEGIC BOTANICAL EXTRACTS (selected)

Ashwagandha, Curcumin / Turmeric (95% & enhanced bioavailability), Berberine HCl, Milk Thistle (Silymarin), Ginseng, Green Tea (EGCG), Saw Palmetto, Boswellia, Rhodiola, Ginkgo biloba, Elderberry, Echinacea, Olive Leaf, Pomegranate, Pine Bark (OPC), Grape Seed, Quercetin, Resveratrol, Fisetin, Apigenin, Hesperidin, Diosmin, Rutin, and many more standardised extracts.

All extracts available as powders or liquid concentrates; standardisation, solvent residues, heavy metals and microbial limits according to target market requirements.

## 05 • LIPOSOMAL TECHNOLOGY – PRODUCT OPPORTUNITY LIST

Actives with established or strong potential for liposomal / nano-lipid delivery. Suitable for oral liquids, sachets, capsules, sprays and selected topical formats. Capability indicates formulation feasibility; commercial viability and regulatory status must be validated per market.

| Category                  | Representative Liposomal-Suitable Actives                                                                                                     |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| Vitamins                  | Vitamin C, D3, E, A, K2 MK-7, B-complex, Methylcobalamin, Methylfolate, Niacinamide, Benfotiamine                                             |
| Antioxidants              | Reduced Glutathione, S-Acetyl Glutathione, CoQ10 / Ubiquinol, Alpha-Lipoic Acid, Astaxanthin, Quercetin, Resveratrol, NAC, Lutein, Zeaxanthin |
| Minerals                  | Iron Bisglycinate / Ferric Pyrophosphate, Magnesium Bisglycinate / L-Threonate, Zinc Picolinate / Bisglycinate, Chromium, Selenium            |
| Amino Acids & Derivatives | L-Carnitine, Acetyl-L-Carnitine, L-Theanine, GABA, L-Tyrosine, 5-HTP, Taurine (dose-dependent)                                                |
| Botanicals                | Curcumin, Berberine, Silymarin, Green Tea/EGCG, Ashwagandha, Boswellia, Saw Palmetto, Ginger, Black Seed, Elderberry                          |
| Lipids & Others           | Omega-3 EPA/DHA, Phosphatidylcholine, Phosphatidylserine, Melatonin, PQQ, NMN/NR (regulatory check), PEA, Hyaluronic Acid, Ceramides          |
| Topical Actives           | Retinol / Retinaldehyde, Bakuchiol, Niacinamide, Vitamin C derivatives, Peptides, Caffeine, Azelaic Acid, Tranexamic Acid                     |

**Flagship concepts:** Liposomal Vitamin C, Glutathione, CoQ10, Curcumin, Berberine, Iron, Magnesium, Vitamin D3 + K2, Melatonin spray, and multi-nutrient liposomal complexes.

## 06 • PHARMACEUTICAL EXCIPIENTS

Functional excipients for solid oral dosage forms, softgels, liquids and topical formulations. We source high-quality binders, fillers, disintegrants, lubricants, coatings and related materials from qualified global manufacturers.

| Function                           | Common Materials Sourced                                                                                                                                                                                                          |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Binders</b>                     | Microcrystalline Cellulose (MCC), Povidone (PVP), Hydroxypropyl Cellulose (HPC), Hydroxypropyl Methylcellulose (HPMC), Starch / Pregelatinized Starch, Gelatin, Polyethylene Glycol (PEG), Copovidone                             |
| <b>Fillers / Diluents</b>          | Lactose (monohydrate, anhydrous, spray-dried), Microcrystalline Cellulose, Dicalcium Phosphate, Mannitol, Sorbitol, Calcium Carbonate, Starch, Compressible sugar                                                                 |
| <b>Disintegrants</b>               | Croscarmellose Sodium, Sodium Starch Glycolate, Crospovidone, Low-substituted HPC, Starch, Alginic acid, Polacrillin Potassium                                                                                                    |
| <b>Lubricants</b>                  | Magnesium Stearate, Stearic Acid, Sodium Stearyl Fumarate, Calcium Stearate, Glyceryl Behenate, Talc                                                                                                                              |
| <b>Glidants / Anti-adherents</b>   | Colloidal Silicon Dioxide (Aerosil), Talc, Corn Starch                                                                                                                                                                            |
| <b>Coatings &amp; Film Formers</b> | HPMC, PVA, Ethylcellulose, Shellac, Methacrylic acid copolymers (Eudragit types), Colour dispersions, Opadry-type systems                                                                                                         |
| <b>Other Functional</b>            | Sweeteners (Aspartame, Sucralose, Acesulfame K, Sorbitol), Flavours, Preservatives, Antioxidants (BHT, BHA, Tocopherols), Plasticisers (Triethyl citrate, Glycerin), Surfactants (SLS, Polysorbates), Controlled-release polymers |

---

## 07 • ADVANCED DELIVERY SYSTEMS

---

Technology platforms and enabling materials that improve solubility, bioavailability, stability, taste masking and controlled release. Belmonte Global supports sourcing of both the enabling technologies and the compatible actives.

### ◆ Liposomal Systems

Phospholipid bilayer vesicles for improved absorption and protection of sensitive actives (Vitamin C, Glutathione, Curcumin, CoQ10, Iron, etc.). Oral liquids, sachets, capsules and topical formats.

### ◆ Nanoemulsions

Oil-in-water or water-in-oil nano-dispersions for enhanced solubility of lipophilic actives, improved clarity and bioavailability in liquids and softgels.

### ◆ Controlled-Release Technologies

Matrix systems, multiparticulate, osmotic and polymer-coated platforms using HPMC, ethylcellulose, methacrylate copolymers and other release-modifying excipients.

### ◆ Bioavailability Enhancement

Lipid-based formulations, solid dispersions, cyclodextrin complexes, particle-size reduction and co-crystal approaches for poorly soluble APIs and nutraceuticals.

### ◆ Microencapsulation

Gelatin, polysaccharide or synthetic polymer encapsulation for taste masking, oxidation protection, controlled release and improved handling of oils, probiotics and reactive actives.

# QUALITY & REGULATORY FRAMEWORK

Documentation and standards are material-, facility- and market-specific.  
Availability and applicability are confirmed for each relevant supply inquiry.

## cGMP

Good manufacturing practice requirements applicable to the relevant material and operation.

## US FDA

Relevant US regulatory requirements and facility status, where applicable and verified.

## EU / EMA

Applicable European regulatory framework and status, where applicable.

## DMF

Drug Master File availability or reference status, where applicable and confirmed.

## CEP

Certificate of Suitability availability and applicability, where relevant and verified.

## ISO 9001

Quality management system certification, where applicable and valid.

## ICH Q7

Relevant GMP guidance for APIs; not universally applicable to all excipients.

## USP / Ph. Eur.

Relevant pharmacopoeial standards, where applicable.
